MAILBOXES THAT CAST LIGHT IN DARKNESS

Working with the designer Christian Bjørn, Allux has created a new range of mailboxes with an integrated LED light that switches on by means of a motion sensor. Mailboxes are typically located in dark areas, away from the light of the house, so a light is a big help when collecting parcels and post after dark.

With online shopping on the increase, customers are demanding larger mailboxes, which can hold much more than just letters. Yet they still want a mailbox that looks great. The top is slightly angled for a lightness of design. The slope causes rainwater to run off it and prevents rubbish and other items from being placed on top of the mailbox.

The mailbox is made of galvanised, powder-coated steel and fitted with a Ruko lock to ensure that parcels and letters are safely locked inside.

Designed by Christian Bjørn

Bjørn Parcel SABlack with grey front

RECEIVE YOUR PARCELS IN STYLE

Clean-cut and beautifully designed parcel mailbox, which holds large volumes of post and large packages. An overhang forms the characteristic shape, which also protects your post from rain and snow. The door is fitted with a Ruko lock, and the mailbox has a concealed catch that locks the flap. Parcels are easy to retrieve from the large, spacious box. Allux Grundform in a timeless design is made of galvanised powder-coated steel and comes with changeable colour/name plates.

Designed by designer Michael Stabell and architect Bent Ulrik Jensen

CLEAN LINES

Traditional, large, spacious parcel mailbox with "soft close", made of galvanised powder-coated steel, which is available in a range of colours and fitted with a Ruko lock.

The model is also available with rear retrieval, a practical and useful solution when placed in a wall, hedge or the like.

THINK BIG

With online shopping on the increase, more and more parcels are being delivered to our homes, hence the demand for mailboxes that can hold much more post and large packages. We've made model 800 Large to meet some of these wishes.

Allux 800S-L Black F54790

SWEEPING LINES

Model 820 is similar to model 800, just with a curved top, giving it a different appearance and causing rainwater to run off it. Due to its curved shape, rubbish and other bits and pieces cannot be placed on top of the mailbox.

SIMPLE SOLUTION FOR A LOT OF POST

Parcel mailbox in a new design that can hold large volumes of post and packages. The flap is stable and strong, in a design that ensures that packages cannot be "fished out" by anyone other than the rightful recipient.

This model is also available with rear retrieval, a practical and useful solution when placed in a wall, hedge or the like.

The range is available in various materials and colours and either with a Ruko lock or a cylinder lock.

DO YOU ORDER PACKAGES ONLINE?

Parcel mailbox for mounting on a wall or stand. This model has a lighter look than the traditional, larger parcel mailboxes. But unlike standard mailboxes, it easily fits packages from your online shopping.

Made of galvanised powder-coated steel, it comes fitted with a Ruko lock or a cylinder lock.

ELEGANT AND USER-FRIENDLY AROUND THE CLOCK

As with Bjøm Parcel, we have also developed a "standard" mailbox together with Christian Bjørn. The same attractive design, the slightly angled top and with the same benefits provided by the LED light. The mailbox is made of galvanised powder-coated steel and fitted with a Ruko lock.

Designed by Christian Bjørn

A MAILBOX THAT BIDS YOU WELCOME

An overhang forms the characteristic shape, offering the best protection for your post from rain and snow. The door is fitted with a Ruko lock, and the mailbox is mounted with a concealed catch which locks the letter flap if need be. The post is retrieved quickly and easily from the large, spacious inner box, which is ventilated, preventing the formation of condensation. Allux Grundform in a timeless design, available in a range of materials and colours.

and order your name and house number for your mailbox

NB! REMEMBER TO GET YOUR NAME AND HOUSE/BUILDING NUMBER ON YOUR NEW MAILBOX.

THE CORRECT ADDRESS CAN MAKE ALL THE DIFFERENCE!

We recommend that mailboxes is provided with name and house/building number, and it is not only out of consideration for the postal service, but for your own benefit, too. In the event of an emergency, we expect the ambulance service, police or fire service to be able to get to us quickly without any problems.

Unfortunately, help can be delayed because it is difficult to find the correct address. This may be due to the fact that the name and house/building number are missing or difficult to see. If you do not already have a name or house numberfor your mailbox, you can order one at ALLUX. COM

You have the choice of a range of fonts and colours. The name plate and the number are supplied on a computer-cut sheet with transfer tape, which is peeled off after mounting so that only the loose letters/numbers remain neatly in place – easy and elegant.
